HEATING AND COOLING SOLUTIONS

DUCTED HEAT PUMPS

The best air anywhere.
At Daikin, we’re not just in the business of heat pumps. We’re in the business of human comfort. Our passion for designing and engineering smart technologies ensures your comfort levels are maximised.

Daikin’s recognised as an expert in air conditioning. As specialists, air conditioning is all we do. In fact, we’re the only company in the world to make both heat pumps and refrigerants which enables us to deliver air conditioning solutions that are world leading in performance, quality and reliability.
A Daikin Ducted Heat Pump provides discreet air conditioned comfort throughout your entire home. It can be installed in a new home or tailored to suit an existing one, and once installed, only the controller, the return air and discharge grilles are visible inside your home.

A Daikin ducted heat pump consists of an indoor and outdoor unit and flexible ducting. The indoor unit is concealed out of sight in your ceiling or under the floor, with flexible ducting distributing conditioned air through vents located throughout your home. An outdoor unit is positioned in a discreet location outside your home.

**DAIKIN DUCTED AIR CONDITIONING AT A GLANCE**

- Return air grille with filter to remove household dust
- Ducting distributes conditioned air throughout your home
- Indoor unit concealed in the ceiling or under the floor
- Small diameter, concealed refrigerant pipes
- Outdoor unit
- Up to eight zones can be managed from a single controller

**FLEXIBLE ZONING OPTIONS FOR YOUR HOME**

Daikin ducted air conditioning gives you the flexibility to heat or cool every room in your home. Your home can be “zoned” to maximise energy efficiency and comfort. For example, you may want the bedrooms in zone one, the living areas in zone two and so on. The position of discharge grilles can also be tailored to suit the shape of each room, for optimum air circulation.

For over 90 years, Daikin has invested heavily in Research and Development to deliver more effective climate control for you and your family. Daikin technologies help make Daikin heat pumps energy efficient, powerful, reliable and easy to use.

---

**1. INDOOR HEAT EXCHANGER**

Our new indoor heat exchangers have been designed to deliver maximum capacity output in a compact casing size. Through the use of cutting edge technologies, our indoor heat exchangers utilise Ø5mm copper pipes to ensure heat is removed from your home efficiently.

**2. DC FAN MOTOR**

Daikin indoor units are equipped with a high efficiency DC fan motor. By utilising high power permanent magnets instead of the induced magnetism of conventional AC motors, Daikin’s DC motor can deliver significantly higher motor efficiency.

**3. SIROCCO FAN**

Daikin’s ducted units are fitted with lightweight single injection moulded Sirocco Fans. These fans feature an aerodynamic fan blade design which reduces turbulence for a more efficient and quieter airflow delivery.

**4. PMV CONTROL**

In automatic mode, Predicted Mean Vote control measures indoor and outdoor temperatures to calculate the ideal room temperature. As conditions change throughout the day, PMV Control gently adjusts your room temperature, maintaining an optimum balance between efficiency and comfort.

**5. INVERTER COMPRESSOR**

Daikin’s swing and scroll DC sine wave inverter compressors are quieter and more efficient than conventional compressors, thanks to their high pressure dome construction and the usage of high pressure lubrication oil.

**6. RELUCTANCE DC MOTOR**

Daikin’s Reluctance DC motor utilises the magnetic torque of neodymium magnets in conjunction with reluctance torque, resulting in more energy efficient operation. These neodymium magnets are 10 times stronger than conventional ferrite magnets.

**7. SAW EDGE FAN BLADE**

The addition of a saw tooth edge at the rear of the blade smooths air flow over the blade surface, reducing turbulence which in turn results in a quieter, more efficient means of delivering comfort to your home.

**8. CROSS-PASS HEAT EXCHANGER**

Daikin’s Cross-Pass Heat Exchanger crosses refrigerant flows from two directions, reducing temperature hot-spots for more efficient operation and enhanced performance compared to single pass heat exchangers.
At Daikin, we have a range of controllers available to control your ducted air conditioning system to suit your lifestyle needs.

NAV EASE CONTROLLER

FEATURES

1. Clear, backlit display with easy-to-read text.
2. Weekly schedule timer, to program on and off times.
3. Home Leave function can turn your air conditioner on automatically when room temperatures drop below 10°C.
4. Quick Cool / Heat mode, which temporarily increases air conditioning power to more rapidly reach your desired operating temperature, before automatically returning to normal operation.
5. Set Temperature Mode Changeover, automatically switches from a cooling to heating cycle, or a heating to cooling cycle at pre-set points.
6. Temperature Limit, to predefine a temperature range for cooling or heating cycles, helping you reduce your energy consumption.

NAV EASE MODEL NO: BRC1E62

ZONE CONTROLLER

FEATURES

1. Backlit display with easy-to-read text.
2. Flexible installation for location anywhere in your home.
3. Three different timer and time clock operations for precise, programmable control for your home.
4. Countdown On-Off timer, programmable in 1 hour increments for up to 12 hours.
5. A simple 7-day Time Clock, to program the controller to turn the system on or off at set times any day of the week. Two different on and off programs can be set for each day of the week.
6. An advanced 7-day Time Clock extends the functionality of the Simple 7-day Time Clock with advanced features such as Zone Control and Temperature Sensor Selection, for the ultimate in-home comfort.

ZONE CONTROLLER MODEL NO:

| BRC23024 | Up to four zones (230-240v) |
| BRC23028 | Up to eight zones (230-240v) |
| BRC2424  | Up to four zones (24v)     |
| BRC2428  | Up to eight zones (24v)    |
| BRCSZC   | Second slave controller for double storey homes |

OTHER CONTROLLER MODEL NO:

| BRC2A51 | Simple L.C.D. wired remote controller |
| BRC4C62 | Infra-red wireless remote controller |

Notes:
1. FDYQ, FDYQN and FBQ models only. FDXS models come standard with wireless remote controller ARC433A103.
2. Zone Controller cannot be used in conjunction with any other controller besides the Daikin Sub Zone Controller option. For a full list of features of the controllers listed here, please speak to your dealer.
PREMIUM INVERTER DUCTED

Engineered to deliver superior energy performance, design flexibility and R22 retrofit capability. The new Premium Inverter range is perfect for your home or commercial application.

14 SINGLE MODELS
THREE PHASE OPTIONS

SUPERIOR ENERGY PERFORMANCE

Daikin’s new Premium Inverter Series takes energy efficiency to the next level. Engineered with features such as a redesigned Cross-Pass Heat Exchanger on the outdoor unit, DC Fan motor on the indoor unit and improved refrigerant control technology. The new Premium Inverter range showcases industry leading energy performance.

DESIGN FLEXIBILITY

Our Premium Inverter systems allow a maximum piping length of up to 150m* and are pre-charged to 30m**. These units are also equipped with a DC Fan motor on the indoor unit with up to 15 different fan speed settings that can be enabled through a field code from your BRC1E62 controller. These features and others are designed to enable flexibility in applying these products into various domestic and commercial applications.

R22 RETROFIT CAPABILITY

The new Premium Inverter range can be retrofitted** onto an existing R22 system by simply replacing both the indoor and outdoor units whilst retaining the field piping intact. This allows for a convenient and cost effective means of upgrading an existing system that may be at the end of its useful operating life.

100 & 180-250 CLASS OUTDOOR UNIT

With a small compromise in energy efficiency, the 140 and 160 Class is now housed in a compact casing for easier installation in tight roof spaces. Further, the 100 and 180-250 Class outdoor unit has been re-engineered to deliver a compact condenser which makes placement of the unit much more flexible.

STANDARD INVERTER DUCTED

Engineered to deliver a compact and efficient design, the new Standard Inverter series is ideal for installation into the tight roof space of any modern home.

8 SINGLE MODELS
THREE PHASE OPTIONS

IMPROVED ENERGY EFFICIENCY

The improved energy efficiencies of the Standard Inverter series have been achieved through the use of a DC Fan motor on the indoor unit and a Cross-Pass Heat Exchanger on the outdoor unit. Pipe sizes on the outdoor heat exchanger coil have been reduced and the number of passes increased in order to improve the capacity output and efficiency of the system.

COMPACT SIZE

With a small compromise in energy efficiency, the 140 and 160 Class is now housed in a compact casing for easier installation in tight roof spaces. Further, the 100 and 180-250 Class outdoor unit has been re-engineered to deliver a compact condenser which makes placement of the unit much more flexible.

FAN SETTINGS

The DC Fan motor on the indoor unit is designed to enable up to 15 different fan speed settings selectable through a field code on the BRC1E62 controller to match the airflow to your ductwork configuration.

HEATING CAPACITY RANGE

6.0kW TO 28.6kW

HEATING CAPACITY RANGE

7.5kW TO 26.8kW

* Applies to model - RZYQ10PUY1
** Applies to models - RZQS50AV1 to RZQS200AY1

Strict guidelines apply for R22 Retrofit Capability, please speak to your installer for further information.
SUPERIOR DESIGN
With an industry leading compact size (245mm height), DC Fan on the indoor unit with an ESP of 150Pa and a built-in condensate pump with a lift of up to 850mm, the new and improved FBQ unit is ideal for applications with tight ceiling spaces. The 75m (100 Class) pipe run also enables greater flexibility in the placement of the outdoor unit.

AUTOMATIC AIRFLOW ADJUSTMENT
Commissioning has never been easier. Automatic Airflow Adjustment feature allows the fan speed to adjust automatically to suit your duct design during commissioning, simplifying the process and saving time.

DESIGN FLEXIBILITY
The new and improved FBQ series also allows for the option of either rear suction or bottom suction configuration giving you greater installation flexibility and easier access for maintenance.

COMPACT DESIGN
The new and improved FBQ series has been designed to meet the construction challenges of modern commercial and medium density apartment development.

SUPERIOR DESIGN
With an industry leading compact size (245mm height), DC Fan on the indoor unit with an ESP of 150Pa and a built-in condensate pump with a lift of up to 850mm, the new and improved FBQ unit is ideal for applications with tight ceiling spaces. DESIGN FLEXIBILITY
The new and improved FBQ series also allows for the option of either rear suction or bottom suction configuration giving you greater installation flexibility and easier access for maintenance.

EFFICIENT & DISCREET
The FDXS Bulkhead range is the ideal choice for air conditioning areas where a discreet installation is preferred.

The indoor unit fits flush into the ceiling with only the suction air and discharge grilles visible inside your home and leaving maximum floor and wall space for furniture, decoration and fittings.

COMPACT AND LIGHTWEIGHT
The compact form factor and light weight of the FDXS Series makes it suitable for a variety of applications with limited installation space while also being easy to handle during installation.

QUIET OPERATION
The FDXS Series is truly discrete with whisper quiet operations (35dBA on the FDXS 25 Class) to ensure limited impact to internal room acoustics.

HEATING CAPACITY RANGE
3.2kW TO 7.0kW

WHAT IS THE DAIKIN COMFORT KIT?

Daikin Comfort Kits are pre-packaged kits consisting of our Slim-Line FBQ-EVE ducted series, Nav Ease wired controller and all the airside accessories you will need for a 3 or 4 bedroom installation at an amazing value.

Our kits help simplify your ducted project by offering a one stop hassle free source for your airside accessories with the guarantee of 100% compatibility with our energy efficient Slim-Line ducted series. Daikin currently offers 5kW, 5.8kW, 7.1kW, and 10kW Comfort Kits.

WHY CHOOSE THE FBQ SERIES?

ENERGY EFFICIENT

The superior energy efficiency of the FBQ Series is achieved through the use of a DC Fan Motor on the indoor unit and a redesigned outdoor unit which includes a cross pass heat exchanger.

AUTOMATIC AIRFLOW ADJUSTMENT

To simplify the commissioning process and ensure the right airflows are achieved, this feature enables the indoor fan to automatically adjust to the appropriate speed to meet your duct design.

COMFORT IN A PACKAGE

Provides ultimate value for 3 to 4 bedroom ducted heating, delivering superior comfort, energy performance and convenience.

COMFORT KIT COMPONENTS

1. FBQ-EVE Indoor
2. RZQS-AV1 Outdoor
3. Daikin Nav Ease wired controller, BRC1E62
4. 1 x Pre-insulated fan coil supply plenum
5. 1 x Pre-insulated fan coil return plenum
6. 1 x Pre-insulated top entry box
7. 1 x Filter return air grille
8. 3(4) x Ø200mm Automatic round plastic diffuser
9. 3(4) x Ø200mm, 6m Polyester insulated duct
10. 1 x Ø350(400)mm, 6m Polyester insulated duct

Example shown is a 60 Class Kit for 3 bedrooms. For more information and other options, please speak to your dealer.

Notes:
1. () brackets denotes for 4 bedroom
2. 400mm duct only applicable to 10kW Comfort Kit
3. Copper piping not included
WHY CHOOSE A DAIKIN SPECIALIST DEALER?

Like us, our Dealers are specialists. They know the ups and downs, ins and outs of air conditioning. So their expertise ensures you get the right advice for your needs.

Daikin Specialist Dealers provide custom designed solutions for your home through an in-home quotation. Dealers will not only supply and install the best possible air conditioning solution but will also provide ongoing maintenance to ensure peak efficient performance over the life of the system.

To take the stress out of air conditioning your home, speak to a Daikin Specialist Dealer. With over 50 Specialist Dealers across New Zealand, our specialists are ready to help you fit the right air conditioning solution for your home.

3. Heating: Indoor temp: 20°CDB/15°CWB, Outdoor temp: 7°CDB/6°CWB
4. Indoor and outdoor sound levels are determined in an anechoic chamber and may differ once the unit is installed due to ambient conditions
**ENERGY EFFICIENCY**

**INVERTER OPERATION**
An inverter system works like the accelerator of a car, gently increasing or decreasing power to steadily maintain your optimum temperature without fluctuations. That means uninterrupted comfort and significant savings on running costs. Dakin premium inverters can also reach your desired temperature faster than conventional heat pumps.

**AUTOMATIC MODE CHANGEOVER**
Automatically selects heating or cooling modes to suit thermostat settings and prevailing room temperatures.

**PREDICTED MEAN VOTE (PMV) CONTROL**
Measures indoor and outdoor temperatures to calculate the ideal room temperature, gently adjusting it for the optimum balance between efficiency and comfort.

**TEMPERATURE LIMIT OPERATIONS**
 lets you pre-define temperature range for cooling or heating, to reduce energy consumption.

**HOME LEAVE**
Ideal for cold climates, when activated, home leave turns your heat pump on automatically when room temperatures drop below 10°C, keeping your home at or above 10°C so it never gets really cold.

**COMFORT CONTROL**

**NIGHT QUIET MODE**
Outdoor unit noise is automatically reduced by 3 dB when outdoor temperatures fall more than 6°C from the day’s maximum (set during installation).

**PROGRAM DRY MODE**
In this mode, priority is given to reducing the level of humidity in the room rather than room temperature.

**INTELLIGENT DEFROST**
During heating operation in low ambient temperature conditions, frost can form on the outdoor unit heat exchanger which can reduce your heat pump’s performance. Dakin’s intelligent defrost system constantly monitors a range of system parameters and temperatures to determine the optimum time to commence a defrost operation for maximum performance in cold conditions.

**HOT START**
Prior to heating, the indoor unit warms to a pre-set temperature before the fan switches on, ensuring only warm air is discharged and eliminating cold drafts.

**QUICK COOL / HEAT – POWERFUL MODE**
This feature temporarily increases power to more rapidly reach your desired room temperature, before automatically returning to normal operation.

**TIMER CONTROL**

**24 HOUR ON/OFF TIMER**
This timer can be pre-set to start and stop at any time within a 24 hour period.

**NIGHT SET MODE**
A timer off circuit gradually adjusts pre-set cooling and heating levels, preventing sudden temperature changes during the night and improving economy.

**SIX DAY TIME CLOCK**
This allows you to program your heat pump to turn on or off at set times for every day of the week.

2. Can be set up by installer during installation
3. Not available on FDYQ125LBV1
4. Not available on Zone Controller
5. Available on FDYQ160LBV1, FDYQ200LBV1, FDYQ250LAV1, FDYQ300LBV1, FDYQ350LBV1, FDYQ400LBV1, FDYQ450LBV1 and FDYQ500LBV1 only

Night Quiet and Night Set modes may reduce capacity. Liner mode operation requires optional P.C.B.
ENVIRONMENTAL CERTIFICATIONS

Daikin Industries Limited has received ISO 14001 Environmental Certification for the Daikin production facilities listed below. ISO 14001 is an international standard specifying requirement for an environmental management system, enabling an organisation to formulate policy and objectives, taking into account legislative requirements and information about significant environmental impacts. It applies to those environmental aspects within the organisation’s control and over which it can be expected to have an influence.

The certification relates only to the environmental management system and does not constitute any endorsement of the products shipped from the facility by the International Organisation for Standardisation.

The specifications, designs and information in this brochure are subject to change without notice. Unit colours shown are as close as possible to actual unit colours. Colours depicted in this brochure may vary slightly.

ASSUMPTIONS

All representations made in Daikin marketing and promotional material are based on the assumptions that the correct equipment has been selected, appropriately sized and installed in accordance with Daikin’s installation instructions and standard industry practices.

QUALITY CERTIFICATIONS

Daikin Industries Limited was the first air conditioning equipment manufacturer in Japan to receive ISO 9001 certification. All Daikin manufacturing facilities have been certified to ISO 9001 Quality Management System requirements. ISO 9001 is a certificate for quality assurance concerning “design, development, manufacturing, installation and related service” of products manufactured at that factory.
